FLANSCHEN FÜR RECHTECKHOHLLEITER MIT NORMALPROFIL

1. Einleitung

1.1 Geltungsbereich

Metallische Rechteckhohlleiter mit Normalprofil zeichnen sich durch ein Breiten- zu Höhenverhältnis von exakt oder näherungsweise 2:1 aus. Normalprofil-Hohlleiter sind genormt in IEC 60153-2, EIA RS-261, MIL-DTL-85, MOD UK DEF-5351 und anderen. Zur Verbindung von Normalprofil-Hohlleitern existiert eine Vielzahl von Hohlleiterflanschen. Diese sind im Detail maßlich festgelegt in den Normen IEC 60154-2, EIA RS-166, EIA RS-271, MIL-DTL-3922, MOD UK DEF-5352 und anderen.

1.2 Zweck

Zweck dieses Dokuments ist es, einen schnellen Überblick über die unterschiedlichen Formen der Flansche und ihre Hauptabmessungen zu geben. Des Weiteren wird eine einfache Bestimmung der normgerechten Flanschbezeichnung ermöglicht.

1.3 Anmerkungen

Trotz großer Sorgfalt bei der Zusammenstellung der Flanschdaten können sich noch einzelne Fehler in die Tabellen eingeschlichen haben. Für konstruktive Arbeiten muss daher trotzdem die jeweilige Norm konsultiert werden.

Dieses Dokument ist kein Produktkatalog. Es kann nicht zur Bestellung von Rohflanschen verwendet werden.

FLANGES FOR ORDINARY RECTANGULAR WAVEGUIDES

1. Introduction

1.1 Scope

Hollow metallic waveguides with ordinary rectangular cross section are characterized by a width-to-height ratio of exactly or approximately 2:1. Such waveguides are standardized in IEC 60153-2, EIA RS-261, MIL-DTL-85, MOD UK DEF-5351 and others. For interconnection of ordinary waveguides there exists a plurality of waveguide flanges. They are defined in detail by the standards IEC 60154-2, EIA RS-166, EIA RS-271, MIL-DTL-3922, MOD UK DEF-5352 and others.

1.2 Purpose

The purpose of this document is to provide a quick overview over the various flange geometries with their basic dimensions. Another aim is to give standard-complying flange designations.

1.3 Remarks

Great care has been bestowed to compile the flange data, nevertheless there might be a few mistakes. For design work, it is thus necessary to check the corresponding standard.

This document is not a product catalogue. It cannot be used to order raw flanges.

3. Document Revision Control

Issue	Date	Description
H	2020-04-17	- Start of the document revision control. - Some descriptions in section 2.2 have been refined. - A new field for alternative flange designations has been created. - Some SPINNER F-Numbers have been changed or added. - The definition of flange thickness (dimension C) has been unified, which has led to many deletions or changes in this value. - Most UK flanges could be checked against the DEF-5352:1958 standard. This resulted in the addition of four UK flanges and several minor corrections. - Most of the flange description fields have been arranged differently to better illustrate their species relationship. - Fields with IEC flanges were colored light green to indicate the preferred character of these flanges. - Several minor corrections were made throughout the whole document.
I	2020-04-27	Issue index I was intentionally skipped.
J	2020-04-28	- Several corrections of flange thicknesses (dimension C) were necessary due to the unification of the thickness definition. - Flange CCR 220 was added. - Several minor corrections were made throughout the whole document.
